The Fate of Democracies

Shrouded in obscurity though the ultimate outcome may be, the future destinies of the democracies in a world riven with external strife and internal struggles, will be determined by the prevailing viewpoint of a mass of individuals comprising those nations who pin their faith to the doctrine of self-government.

The die may be already cast for those countries which adhere to the democratic ideal, who believe in and practice freedom of thought and speech and the right of the individual to govern himself, but before their future can be predictable with any reasonable degree of certainty, cohesion of thought and action must develop and objectives must be crystallized in the public mind.

When a world horoscope is attempted one may well say: "Now we see through a glass darkly, but if trends of thought and utterance are an indication of future state, within a few years the enveloping haze may clear and the goal stand out in sharp definition, sufficiently clear cut to have a straight course. When the muddle of the multitude has ceased and the chaos of ideas has merged into a distinct channel, then, and not until then, will it be possible to say whether we are heading.

Stewards May Show The Way

What direction this channel, when it becomes defined, will take, it is difficult at this juncture to state, but once in a while someone expresses a thought which may give direction. Such a one is the Attorney-General of Australia, R. G. Menzies, who recently gave utterance in London, England, to suggestions which might possibly be regarded as a straw showing which way the wind may blow, or even as a milestone on a broad highway, to a specific objective.

The basic idea behind Mr. Menzies' utterances is unification of the fields, purposes and policies of the integral parts of the British Empire, founded on a better understanding by the peoples of these units of one another's aspirations and objectives. And the achievement of this aim, he suggested would have to be based upon two elements, which he outlined as follows:

"1.—A government in Great Britain which recognizes that on all large matters, particularly those of international policy, it is speaking, in fact, not only for the inhabitants of these islands, but for British people all over the world, and therefore, realizes that it must be as far as possible, before arriving at any decision, invite dominion criticism and attach proper weight to dominion views;

"2.—The governments in each of the dominions which realize that as members of a closely-knit family of nations they are responsible, not only for the wise handling of their own problems and policies, but also for an effective contribution to a wise Empire policy and real Empire security.

"In other words," said Mr. Menzies, "let us all realize that the independence of each of us is to some extent dependent upon the independence of the others. Let us move more and more thick in terms of British unity and how we can make it an effective instrument for peace and justice in the world."

The Danger of Sectionalism

With dictatorship of one sort and another apparently flourishing in some parts of the world and various aggressiveness ruling the roost in other sections of the globe the question of security for peace-loving democracies may at any time become a vital issue, but such security cannot be built up overnight and to be effective and enduring it must be based on complete understanding and unity of purpose.

To give point to the assertion one is reminded of the fable of the old man who called his sons together as death approached and urged them to pool the resources he had. Through the fable, he said, that if they stick together no harm could befall them. He illustrated his precept by handing each of them a bundle of sticks bound together with instructions to break them. The boys found it was impossible to do so, but when the sticks were separated they were snapped asunder with ease.

An effective unity cannot be built up if the elements which should comprise it are isolationists or are engaged in the promotion of sectionalism, provincialism or even a narrow nationalism, policy, as it is called. As Mr. Menzies of Wesley College, Winnipeg, aptly expressed it at a recent conference on economics and politics: "A proper degree of civic pride is good, but when it goes too far it becomes provincialism and endangers the nation's integrity." Similarly in a wider field he might well have pointed out that a narrow nationalism endangers Empire integrity and the destruction or impairment of Empire integrity, is an equal threat to the security of its component parts.

Dog Was A Hero

Clarence Buser's collie dog is pretty much of a hero around the Buser farmyard in Jerseyville, Ill. Buser said that while his dog destroyed \$1,000 worth of hares and property, the dog not only ran into the burning buildings and chased two and their litter out, but he also ran the pigs out of the pig of walling snubbers and into a nearby pond.

It is estimated that the primitive herds of buffalo roaming the American plains, numbered about 75,000,000 animals.

Legumes Should Be Used

In Order To Get Necessary Nitrogen Back Into Soil

So far as known, the members of the legume family (clovers and vetches) are the only plants which possess in any marked degree the faculty of absorbing and fixing the nitrogen of the air. There is a vast supply of this element in the atmosphere, in contact with but unavailable to our crops and pastures. It is a case similar to that of the "Ancient Mariner" who exclaimed, "Water, where everywhere, now any drop to drink!"

Think of it! the atmosphere contains 78 per cent. of free nitrogen, free only in the sense that it is uncombined with the oxygen. Then, consider that the infinitesimally small amount of carbon dioxide gas in the atmosphere is assimilated by the leaves of plants and is the source of the carbon which constitutes the bulk of their dry matter. Consider again the millions of dollars spent in the construction of the factories which by electro-chemical means fix atmospheric nitrogen in forms suitable for use as fertilizers. The most important of these is that the fullest possible use should be made of legumes—clovers, alfalfa, etc.—in cropping systems.

Remember that atmospheric nitrogen not only for their own needs but for that of other plants growing with them or after them. In order that our nitrogen factory in the soil may function properly we must see to it that the plants are not deprived of the necessary supply of phosphate and potash.

Hard Weed To Fight

Ontario Dairyman Tells How To Get Rid Of Mustard

Mustard is a miserable weed to fight. The oily seed will stay in the soil for years or after them. In order that our nitrogen factory in the soil may function properly we must see to it that the plants are not deprived of the necessary supply of phosphate and potash.

Mustard is a miserable weed to fight. The oily seed will stay in the soil for years or after them. In order that our nitrogen factory in the soil may function properly we must see to it that the plants are not deprived of the necessary supply of phosphate and potash.

Some Simple Rules

Tell How You Can Get Yourself Out Of Trouble

The Rev. G. B. Baileys, vicar of St. James' Church, Hermonville, B.E. London, gives the following rules to his flock on "How to get yourself out of trouble."

Let the other fellow see that he is not a fool. Let the other fellow see that he is not a fool. Let the other fellow see that he is not a fool.

Point out how badly they are behaving, unless they follow your advice."

Must Be Absent Minded

Pioneers Left Their Automobile At Ontario Park Boast

Park's employees are accustomed to being asked to find odds and ends left behind by pioneers. Recently Park Superintendent Hill, of Galt, Ont., had a tall order. A long-distance telephone from Toronto, had been asked to locate a green roadster left in Soper Park after a week-end picnic. The car was found on one of the islands in the north of the park, and returned to its owner.

Lasted Seven Days

Some wedding ceremonies on this continent may seem elaborate but a recent wedding in Toronto, lasted seven days during which 400 guests consumed four oxen, six hogs, 1,500 eggs and 3,000 litres of wine.

Theodore Roosevelt was the first President of the United States to sign an airplane. He went up to a plane similar to the one the Wright brothers first flew.

The calf of the African swamps is the only fish which will swim up a river against the current. Its position is either dead or dying.

The book with the saddest ending is our bank book.

Tribute To Old Line

New Marcellus Name Placed When Voted Until Launching

For all its history reserve the Cumberland Line frequently amazes us with a sudden touch of sentimentality. Robert White in the New York Sun.

We are really coming to believe that the directors are just a bunch of old softies at heart.

When the Marcellus was launched the name of the ship was to be voted. This, if you have ever attended a launching, is an unusual thing—most of the lines being sailed with the getting of dry ships down the ways. Before Lady Dales pulled the button which sent the new Cumberland into the water and until that moment as a tribute to one of the greatest of ocean greyhounds, the old Marcellus.

We tried to find out what became of the plates from the liner's name-plate, but didn't have much luck. Cannot find out what our men had purchased a complete set and that the other was sold piecemeal one lot to the government and another there.

We are sorry with the line, would like to know who has them.

Not A Bad Idea

If Radio Sets Could Be Equipped With Earphones

This letter by J.O.S. appeared in the New York Sun: "The loud-mouthed radio being a nuisance to many of us, it occurs to me that if radio sets were provided with outlets for earphones some one might be able to tune on some same program could plug and escape the goody din coming from the morning, noon and night radio blare."

These disturbances are skip-to-the pests who, rather than get out and drive a doorknob, look their horns on Sunday mornings when most of us are just about to turn over for another snooze. A plague on both their houses.

Broadcasting stations could start with a radio set to their own ears, close those noisy books to try the "hissing resonance" of loud noise and privacy.

Use of earphones, and if some Hollywood idol endorsed the movement the fad would sweep the country like wildfire.

SELECTED RECIPES

CHOCOLATE SPONGE CAKE (Four Eggs)

4 squares Baker's Unsweetened Chocolate
1 1/2 cups sifted Swiss Down Cake Flour
1 cup milk
1 teaspoon vanilla
24 eggs
2 cups granulated sugar
1 cup sugar
1 cup water
4 eggs whites, stiffly beaten

Beat chocolate and sugar to milk in double boiler, and cook 10 minutes. Add milk and beat until thick, stirring constantly. Cool, covered. Stir off.

Beat four eggs, measure, add baking powder, salt and 1/2 cup sugar. Beat together three times. Add water to egg whites and beat with lemon-colored. Add 1/2 cup sugar gradually, beating until very thick—about 6 minutes. Fold in flour, alternately with chocolate mixture.

1/2 at a time, adding chocolate mixture; then fold in egg whites. Turn into two slightly greased 8-inch layer pans. Bake in moderate oven (350 degrees F.) 30 minutes, or until done. Spread Hittesweat Filling between layers and Orange Frosting on top and sides.

HITTESWEAT FILLING

2 squares Baker's Unsweetened Chocolate
4 tablespoons sugar
2 eggs
2 egg yolks
1/2 teaspoon vanilla

Beat chocolate in double boiler. Add sugar and blend. Add milk very gradually stirring after each addition until smooth and blended. Add egg yolks one at a time, beating well after each. Continue cooking and stirring 3/4 hour. Add vanilla. Cook about 10 minutes. Spread between two 8-inch layers. Double shortening for enough butter to spread between three 8-inch layers. For all-chocolate cake, spread between chocolate layers and spread any favorite chocolate frosting on top and sides.

An extensive search for oil is to be made in New Zealand and several companies have been granted drilling permits. One company which is soon to begin drilling operations is bringing a plant worth \$350,000 from Australia.

A woman writer advises: "Whenever I am in the dumps I pick myself out a new hat." So she is glad I find "fun."

"There's a Christie Biscuit for every taste"

A Strange Case

High Temperature Apparently Normal For South Africa Man

A Natal man living in Harleimith claims to be the "hottest" man in South Africa. Five years ago he was discovered that he was "running a temperature." He was put to bed, the diagnosis being "flu. He did not respond to treatment and the next diagnosis was a chronic case of appendicitis. The appendix was removed, but the temperature remained, and has tonsils and a stoma operation followed in quick succession.

Still the temperature remained. Then commenced a round of the leading heart, nerve, tropical disease, and other specialists in Johannesburg, but the temperature remained. This was followed by a period in the Johannesburg General hospital, where other specialists examined him, and eventually he was handed over to the South African Institute for Medical Research, but there, too, all tests, blood counts, and so on, proved normal.

After five years the doctors have come to the conclusion that he is a freak, a man who walks around with a temperature which every day averages anything between 98.2 and 100 degrees—a temperature which would send any normal man to bed.

Definition Of Advertising

Nightly Fever Which Will Keep Business On The Move

Advertising is a nightly fever to which we become exposed the moment our father puts our birth notice in the newspapers. Harold M. Gully, vice-president, Silverwood Toronto, Dairy Ltd., Toronto, told members of the Rotary Club at a recent noon-hour meeting.

The average accountant may say it is a questionable expense since you cannot always trace results, and the experienced manager may say it is an absolute necessity, added Mr. Gully, "but call it what you will, advertising keeps your stock-in-trade fresh; holidays; it brushes away cobwebs and dust, smoothes sharp corners, quickens the knowledge of salespeople and lets in the sunlight."—St. Thomas Times-Journal.

A Special Command

"Hail!" yelled the sergeant to a new squad of recruits. But one of them marched on.

"Here, Jones, what were you doing before you joined the army?" yelled the sergeant.

"A horse driver, sir," replied Jones. When the squad was marching again, the sergeant cried: "Hail, Jones, what were you doing before you joined the army?"

Nearly all of Canada's commercial crop of grapes is grown in the Niagara Peninsula, Ontario.

Experts Studying Subject

Want To Determine What Takes Place When People Die

When medical science knows more definitely what takes place when a person dies and when death approaches, it is expected that still further progress can be made in sustaining life. This is one of the objectives of those who are experimenting with the use of electro-cardiograph in cases of apparent drowning, electric shock and carbon monoxide poisoning.

It has been proved conclusively that a suspended state of animation can so resemble death that ordinary methods will fail to discover life. The result has been that thousands of persons have been taken from the water and declared dead too soon, artificial respiration being discontinued long before such efforts might have proved successful if carried on.

This knowledge—coupled with the fact that there are nearly a thousand cases of accidental drowning every year in Canada—prompted the organization by Dr. Gordon Rains, General Director of the Health League of Canada, of a group of experts to study the subject.

Sir Frederick Hastings and others have been actively at work to discover more facts concerning the suspension of animation. As a contribution to this study as well as to the possibility of saving more lives, the harbor authorities are co-operating by prompt installation of the commode when accidents occur. In other parts of the country, too, the publicity given the movement has had the effect of a more general summing up of medical aid and longer-sustained efforts at resuscitation.

The portable electro-cardiograph was used for the first time at Hamilton, Ontario, in a case in which was one of electrocution, the device proved that the victim was dead. It is hoped that a wider use will be found for it as it is believed by the experts in Toronto that it will prove, in many cases, an encouragement to greater efforts in artificial respiration.

Seems To Have Something

Italian Editor Stirs Campaign Which Should Interest Men

It isn't often we agree with the Fascists, but one of their leading editors, Virginio Gayda, of *Il Giornale d'Italia*, seems to us to have something in his campaign to abolish collars and neckties.

"It is really a matter of liberality," he writes, "and of liberality that affects the eyes," he writes. And he adds that if light collars are discarded the better nourished veins of the Italian men will be able to show more clearly.

Freedom from collars and neckties would be a plus thing, and it didn't liberate our cerebral circulation? It would make us a doggone deal more comfortable. It would be so we're going to watch the progress of Editor Gayda's campaign with interest, hopeful that the Italians will be wearing no neckties at all except, of course, Mr. Mussolini's—New York World-Telegram.

Will Shorten Terms

New Prison Regulations Mean Earlier Release For Convicts

Retrospective feature of the new prison sentence regulation regulations that became effective Aug. 15 will mean the shortening of the terms of many convicts now in federal prisons.

Change in regulations, recently announced by Hon. Ernest Lapointe, justice minister, were designed to give immediate effect to some of the recommendations of the royal commission on Canada's penal system.

The new regulations provide that good conduct remission allowances may be earned from the first day in the penitentiary. Former regulations provided a convict had to be in prison six months before he could earn time off. As good conduct remissions have approximated four days a month this feature, being retrospective, gives an immediate 24-day reduction to many prisoners.

New Rose Is Green

Red, pink, yellow or white roses are beautiful, but not unusual or new, but a green rose is new. Mrs. William Dennis, who resides near Naples, N.Y., has had frequent reports to her garden to see a green rose blooming there. Each petal is a vivid green color with no suggestion of any other color—and the bloom is well developed.

Had Afternoon's Work

It took an assistant a whole afternoon to check payment of an account sent by a customer to King Wilk, Hamilton, South Africa. The customer had sent a wholesale firm \$12 (\$60) in penny stamps in settlement.

Not A Justification

But Drunken Drivers Are Not The Only Mischief To Traffic

We believe, says the *Ridgeway* Dominion, there is a tendency to overemphasize the part that drunk driving plays in the appalling record of tragedy on the highway, and think the root evil is just as dangerous.

This statement is not intended as a justification of the drunken driver. He is a menace, and should be treated as such. There is, however, a certain type of propaganda which plays up the prominence of "drunk as a contributing factor in motor accidents, though even this propaganda claims liquor to be responsible in only about six per cent. of fatal accidents. Obviously the other 94 per cent. are caused by other factors.

The prominence given to the liquor factor creates a feeling that as long as a driver is sober, he is all right, and can get away with anything, whereas driving a car on the highway calls for the exercise of every caution and the use of plain common sense even when the driver is not drunk.

The slaughter of over 42,000 people in the United States in 1937, and the injury of over a million others, were not all due to liquor and while we do not advocate any letting up in the campaign against the drunken fool at the wheel we do feel that the root evil in the same position needs more emphasis.

Plain ordinary cutting in, following too close, passing on hills, hogging the road, making turns at too high speed, one-eyed cars at night, crowding in front of other cars, and the like, make up the majority of the mischief on the highway, and above all the tendency to be in a hurry—this latter probably includes most of the others.

It is a prolific cause of accidents whether the driver be drunk or sober. The modern useless crash for speed and more speed—at the bottom of most accidents. Too big a hurry to get to the office, to do nothing of importance—and the ditcher and morgues are filled with proof of the speed slogan which is coming prominently into use of late—"Death Begins at 40!"

Mineweeper Launched

Is Second Of Four Canadian Ships Being Constructed

The second of four Canadian mineweeper ships under the ways of the Vancouver shipyard with a prayer from Mrs. J. W. de P. Parrie wife of Senator Parrie of Vancouver, that "this ship will sweep away the thought of war from all the seas of the Empire."

Strutless and deep-throated roars from ships in Vancouver harbor mingled with the shrill whistles of the shipyard as H.M.C.S. *Comox* left the sea on her keel for the first time. The ship is 100 feet in length, the *Comox* was the second of four Canadian mineweevers now under construction to be launched. Only the last of the four ships, *Launceston*, is to be launched in the St. Lawrence shipyard, while the other two are still in their respective home ports, in Ontario.

When her engines, powered to give a speed of from 12 to 14 knots, have been launched, the *Comox* will be ready to act in the service of Canadian citizens in peace-time and war. While the country is at peace, the sturdy little vessel will patrol the British Columbia coast, act as a fire boat for protection of shipping and equipment in Vancouver and perform other duties.

Equipped with one or two anti-aircraft guns and one four-inch gun as well as depth charges and minelaying and mine-sweeping equipment, she will be prepared to take part in the defence of Canada's Pacific coast under any future war.

For New Crop Only

Price Fixed By Board Does Not Apply To Old Wheat

The Canadian wheat board issued a statement stressing that the fixed price of 90 cents a bushel for No. 1 Northern hard wheat, delivered at Port William, applied only to new crop wheat.

Old crop wheat will not be compensated for delivery and companies were requested by the board to see that old crop wheat, in more either in country elevators or in terminals, is not offered the board.

Soviet Not Exporting Wheat

World grain exporters need not fear a flood of Soviet grain on the market this year, in spite of bumper crops, states the *Brandon Sun*. The grain area but 7½ million acres in 1937, but yield was boosted by a combination of better cultivation and harvesting. Most of the surplus will be stored as military reserves for the Soviet's largest army. 2268

Conquest Of The Arctic

Regular Schedule Takes Place To Fringe Of Polar Sea

The airplane is making further encroachments on the territory where a short time ago the husky and valiant were the only means of transportation.

Aerial conquest of the Arctic wastes through regular commercial flights was carried through successfully first in North America. Settlements in Victoria, land, lying north of the Polar sea at 70 degrees north latitude. The flights via Heligoland require 15 hours. Thus, by using this "Arctic Air Express," the traveler who leaves Berlin in the afternoon can spend the night in Heligoland and arrive at this tip of north Finland before evening.

Their Trademark

High Hats Are Worn By Chimney Sweeps Of Bremen

High hats are not always a sign of riches, according to H. A. W. Richter, Hamburg, Germany, travel authority who reports that in Bremen their are the trademark of chimney sweeps. High hats and Elton jackets for years have been the uniform of the profession. It is a common sight for travelers to see a group of "sweeps" mounted on bicycles going off to work, with their colored ropes over their shoulders and high hats perched on their heads.

A Little Doubtful

A spontaneous old Irishman whose sister was near the end of life's journey, said: "Marry, ye should be resigned and content to leave this world of trouble and go to your heavenly home where ye will meet Aunt Ellen and Cousin Mike and 'Uncle Dennis' the rest of the McMorlans." Mary meekly murmured, "If they are there, Archie."

Barley Area Increased

Expansion In British Empire Due To Recovery In Canada

The world area under barley which has fluctuated irregularly since 1930, appears to have increased in 1937, states the Imperial Economic Survey as compared with 1936, but precise comparisons with earlier years cannot be made in the absence of recent figures for the Soviet Union. The British Empire area, which comprises about one-seventh of the world total, declined until 1932-34. Recent years have shown a slow expansion, due partly to the recovery in Canada. The chief markets for imports of barley are found among the European countries, though large quantities are exported from Canada to the United States, which in 1936 took 70 per cent. of the Canadian shipments.

Vancouver is to be the meeting place for trans-Canada planes and Pacific for boats to the great Empire always which are being planned. Dredging is to take place for a big flying-boat harbor near the existing aerodrome.

Coffee is bought by the ounce by the Greenland Eskimos who mix barley and rice with it, and then use it at least four or five times.

The state of Wisconsin boasts the world's largest cheese factory.

WESTERN CANADIAN INDIANS HOLD POW-WOW

The horse and the automobile blended with the teepees make this picture a study in contrasts. It was taken at Hauff Springs in the Canadian Rockies where Stony Indians gathered recently to attend a big pow-wow. C.P.R. Photo.

England Has New Wheat

Yield 10 Per Cent. Higher Than Existing British Varieties

The new type of wheat yielding at least 10 per cent. higher than the best existing British varieties has been evolved after lengthy research. It is rust resistant and able to withstand heavy storms because it grows short. The cross-bred grain has not yet been named. It is the result of intensive research for 10 years by Professor F. L. Englewood of the Cambridge Plant Breeding Institute.

Grown on test plots four feet square on the grounds of the National Institute of Botany at Cambridge, the new wheat has been cut. Its color has not yet been fixed but the seed will be released for commercial production once whiteness is assured.

The discovery is considered to be a valuable contribution to the campaign to increase the production of home-grown food in the United Kingdom.

Make For Stability

The Fine Record Of Our Canadian Banking System

Canada's banks and Canada's insurance companies have given a good account of themselves. They have contributed in a large way to the building up of this young country. They have been criticized on many occasions, of course, but that does not prove they are wrong.

The principal complaint against the Canadian banking system is that it is too conservative. The best answer is that during the long years of depression, when financial institutions fell by the hundreds across the line, every Canadian bank remained in business, met its obligations fully and carried on in a normal way. Indeed, nothing could be more true to maintaining the national morale, the national confidence, that the fine record of our banks. And the same thing was true of our insurance companies, large and small—Windsor Star.

Tip From Poultry Expert

Knock Before Entering Henhouse To Prevent Alarm

Before going into the privacy of the henhouse it's a good idea to rap on the door, says H. W. Titus, a poultry expert at the national agricultural research station in Beltsville, Maryland. "Then the chickens know what to expect, come to attention and face the door," he explains. "There is no 'Surprise' alarm."

Otherwise, the birds start to get excited, flutter, and injure themselves.

Only 7,700 of the 35,700 radio broadcasting stations in the world are engaged in broadcasting entertainment. The others are used for radio communication with ships, aircraft, etc.

The Government of Tennessee has provided several scholarships for schoolboys who will be trained as gliding and flying pilots.

A traffic expert urges pedestrians to wear white clothing after dark. Something appropriate—like a white sheet.

The stories we had to read at the back of the barn as kids now come in on the radio.

Princely Generosity

Rule Of Small Country Pays All Of Its Expenses

Prince Frans of Liechtenstein is dead at 85. He was absentee ruler of a country of 2,600 people, became in recent years the legal refuge of absentee corporations.

He was the son of the first and the holding company, his tiny country shipping, as it did, the tremendous waves of democracy, nationalism and World War that swept over Europe in the decade before and during his life.

As befit a prince, he was generous. His subjects were untaxed, the principality's small expenses being paid for out of his pocket. As befit one of the richest men in the world, he made Liechtenstein the "Delaware of Europe." Incorporation was easy there and fast-fading industrial empire whose heads never set foot in Liechtenstein before their nominal shareholders in the tiny capital, Vaduz. It is a paradise for tax evaders, but, like other Eden, has its serpent—the threat of a Hitler bar and a subsequent strait-jacketing of whatever assets may be sought by Reich's agents.

Frans of Liechtenstein did a tidy business in the incorporation fees of foreign corporations. The business rested on nothing but the elaborate fiction of Liechtenstein's "sovereignty." This independent "nation," with a Swiss postal system, a Viennese army, and nothing but the possible intervention of Frans and England to save it from German domination, nevertheless was able to harbor the tax dodgers of Europe. The injured Austria-Hungary, which 50 years ago, regarded Liechtenstein as the slightest of its dependencies.

It is to be hoped that Prince Frans had a sense of humor. What could give more satisfaction than collecting royalties on a history of his reign, and a geographical accident? —New York Post.

The Great Red Menace

Preventing Forest Fire Only Way To Preserve Timber

Forest fires are the great red menace to British Columbia's prosperity and ordered growth. Every year the province loses \$100,000,000 in the threat, though happily, not always the destruction that this year has seen.

It is not enough to fight these forest fires when they appear. We should be doing something to make sure they do not start, to snuff them out instantly if they do appear. This means care and organization and the expenditure of much money.

The forest itself yields a great return. In spite of the destruction, it will continue to yield for years. But that return is not so much revenue as capital turned over. We are using the forest as much as we need necessary for the forest's preservation. Forest, forest, forest, reforestation — they are all necessary if we are to keep this great resource of the province.

—Vancouver Province.

Time Being Reduced

Modern Ocean Liners Cross Atlantic At Great Speed

Trans-Atlantic greyhounds have clipped almost a full day off the record crossing-time in the past decade.

In March, 1936 the German liner Europa made the westbound crossing of the Atlantic in four days, 17 hours, six minutes to lift the blue ribbon—21 hours, four minutes more than the British liner Queen Mary required on the record-making voyage completed in three days, 21 hours and 48 minutes.

Making It Clear

When Queen Mary visited Benares, as the Princess of Wales, she was much amused to see a banner stretched across the road along which the royal procession was to pass with the following inscription: "God Bless the Princess Female."

A rust storm which struck the western part of Tokachi Province in Japan, ruined most of the crops and covered all the houses with a thick layer, destroying five factories and several other buildings.

In a true alibi, pigment is lacking. Not only is it lacking in the skin, but in the deeper layers as well.

Speed of the Gulf Stream, as it flows along the Atlantic coast of the United States, is about five miles an hour.

WORLD HAPPENINGS
BRIEFLY TOLD

At Port Arthur, Hon. C. D. Howe, minister of transport, was made Chief "Neo-Ga-Neo-Ga" chief of the land and the air by a group of Indians playing a street carnival.

The Helsinki stadium will be enlarged to accommodate 60,000 spectators for the 1950 Olympic games. It was decided by Finnish Olympic authorities.

Calgary now owns land for a new \$250,000 airport. Payment of \$31,726 for the property, 640 acres of farm land just outside the north city limits, has been made, civic authorities announced.

Blind and deaf since birth, Winthrop Chapman, 25, has sailed for South Africa as an apostle of a system of lip-reading by touch. He is a son of a Redfield, South Dakota, doctor.

The small red boxes which the Roumoussoum corporation placed in all their homes last year to receive fair shares, conductors omitted to collect yielded almost \$940 when they were opened.

Former Edward Deland, in a press interview, declared there was no cause for concern in the present financial situation and set at rest rumors that French finances were in a critical state.

Of the 45 countries supplying honey to the British market, Canada again held first place, with slightly more than 22 per cent. of the total imports which amount to 39,722 cwt. Of this amount Canada supplied 19,984 cwt.

An 11-ton white marble Buddha, gift of China to Great Britain, has created a housing problem in the British Museum which officials say will not be solved until a suitable place is found. It dates from 685 A.D.

The French ministry of posts has issued a special postage stamp in honor of the 100th anniversary of Dom Pierre Perignon, the Benedictine monk who invented the developed the process of making champagne.

Clever Young Violinist

Ten-Year-Old Winnipeg Girl Awarded \$5,000 Scholarship
Dana Greene, 10-year-old Winnipeg violinist, has been awarded a \$5,000 scholarship as an American Conservatory of Music.

The young girl left recently for Chicago, but before leaving, a friend presented her with a \$1,000 violin. She is a pupil of George Bernoff, Winnipeg.

Of Ukrainian descent, Dana is the daughter of Mr. and Mrs. George H. Greene. The father is an engineer in the good road department of the Manitoba Government.

She will study under Herbert Butler, of the American Conservatory, Chicago.

A Thriving Industry

Canada Produces Millions Of Leather Gloves Every Year

There is a good demand for leather gloves in Holland and Canadian supplies to that country have been increasing, particularly gloves for cyclists, motorists and workmen. Canada produces millions of leather gloves every year and the hides used in producing the leather come from Canadian farms. No fewer than 7,232,076 pairs of leather gloves were produced in the last year. In 1938, cowhide being used for 2,505,612 pairs, sheepskin for 1,971,073 pairs and muskrat for 952,398 pairs, with a total value of \$4,024,550.

Task For The Courts

Belgian Woman's Will Necessitates Being Back Over 300 Years

Bequeathing her money to relatives to the twelfth generation, a Belgian woman has given the courts in Yverdon, a task of dividing millions of francs among more than 4,000 people. A professional genealogist has made a family tree 450 feet long and going back to 1600. Among the heirs are a cabinet minister and two professors.

Letter Boxes On Buses

The experiment of fixing letter boxes on buses plying on one route in Bombay having proved a success, boxes are to be provided on a second route. It has been found that letters posted in these boxes reach the G.P.O. quicker and a later hour of posting is afforded. The letters are cleared at a stop near the G.P.O.

In Palestine, families rent space in hothouse even by the yard and have the family bread in exactly the same spot each time. They feel that any variation in position will affect the loaf.

Plans Being Made

For Canadian Representation At Seventh World Poultry Congress

Indications are that Canada will be well represented at the forthcoming Seventh World Poultry Congress with a number of provincial or sectional exhibits and commercial and live bird exhibits. The congress will meet at Cleveland, Ohio, from July 27 to August 7, 1939. The members of Canadian representation of the congress in their meeting at the Central Experimental Farm, Ottawa, have been busy arranging pre-congress tours for European delegates, Canadian tours to the congress, and matters pertaining to the exhibits and other details.

Canada has been represented at all the previous World Poultry Congresses except the first one which was held at the Hague, Holland, in 1921. The second Congress assembled at Barcelona, Spain, in 1924; the third in Ottawa, 1927; the fourth in London, England, 1930; the fifth in Rome, Italy, 1932, and the sixth at Leipzig, Germany, 1936.

Still Looking For Ruler

Five Signs By Which Thieves Will Know Dalai Lama

Lord P. Burder of the Leinstershire regiment stationed in India has returned to Darjeeling after a history-making hike into Tibet and back. He took a month to complete the journey of 500 miles and his boots were worn out when he arrived back.

Everywhere in Tibet, Lieutenant Burder found the friendliest welcome, and a country-wide concern for the new Dalai or Thabhi Lama. They eagerly await the signs of Dalai Lama's reincarnation. There will be five signs, they told him. Folds on the shoulders (being vestiges of a second pair of arms); large ears; marks on a couch shell on the hands; tiger marks (stripes) on legs; and eyes with brows that are long and curl upward. "The last Dalai Lama had the first three signs it is not apparently necessary that all five signs should be present."

SLIM FLATTERY EASILY MADE

By Anne Adams

An average of 300 guests a year during the past 10 years has taken advantage of Myra's "hobby."

Based at his home, used his 50-foot swimming pool and rounded the two acres of gardens which surround his home.

The parties given at his home always are well chaperoned. Myra said, "but on some counts they must do as I say."

Will Have Freight Train Traveling Faster Than To-Day's Express

According to Pullman Advertisement the tomorrow of railroading will not only up a new world. For will open up high speed, high-powered, bullet-nosed, streamlined trains by cutting through time on every line, but the merchandise of the world will also be carried at speeds far greater than the ordinary passenger train is travelling to-day. For your freight trains, too, will be light weight, modern carriers, travelling with the speed of the wind.

Taking It Easy
A motorist drove to the centre of the mile-long Chemung floating bridge near Peterborough, Ont. recently, parked his car and fished without getting from his seat. He caught a bass, dragged it in and drove away.

During the last eight months of last year, 2,358,000 foreign automobiles entered the Dominion of Canada.

SO RIGHT FOR EVERY MAN—whether or not she has to reckon with over-emphasized curves! And Pattern 4863 is a perfect example of the new trend in shirtwaist dresses. This season's tailored frocks have a softer, "dreamlike" effect, shown in this design with its smartly slendering yokes, neat little puffed sleeves and soft gathers at centre front and waist. Don't you like that neat skirt with a centre seam and single inverted pleat? Fluffy buttons and pockets add charm too! This frock is so easy and inexpensive to make up that you're almost sure to want several in a variety of fabric.

Consider checked cottons and washable synthetics... for now, and autumn too! Sewing Instructor included.

Pattern 4863 is available in women's sizes 34, 36, 38, 40, 42, 44, 46 and 48. Size 38 takes 3½ yards 36 inch fabric.

Send twenty cents (36c in color) cannot be returned for the same Adams pattern. Write plainly Size, Name, Address and Style Number and send order to The Adams Pattern Dept., Winnipeg Newspaper Union, 375 McDermott Ave. E., Winnipeg.

JIM HOGAN, JASPER, ALTA., WINS JUNIOR GOLF CROWN

Young Canadians have now a stronger incentive to take their golf seriously for the handsome Buckingham Cup donated by Charles H. Scader of Hamilton to the Royal Canadian Golf Association is one any lad would be proud to hold. The first winner is shown above receiving the trophy from Mr. Scader. He is 18-year-old Jim Hogan, sharpshooter from Jasper, Alta., who carded 157 over the London Hunt and Golf course to lift the Canadian Junior crown this year.

Hobby Is A Pleasure

Florida Bachelor Throws Home Open To Many Guests

Joseph F. Miyares, lawyer and self-styled "old bachelor" of Tampa, Fla., has been host to more than 300,000 guests during the last 10 years at his home, Villa del Rio, and most of his visitors have been children of high school age.

The Tampa attorney said "it's simply a hobby and the pleasure is all mine," as he explained that reputable organizations, high school fraternities and class parties were welcome to use his home at any time for "good, clean, wholesome fun."

An average of 300 guests a year during the past 10 years has taken advantage of Miyares' "hobby."

Based at his home, used his 50-foot swimming pool and rounded the two acres of gardens which surround his home.

The parties given at his home always are well chaperoned. Miyares said, "but on some counts they must do as I say."

Railroads Of Tomorrow

Will Have Freight Train Traveling Faster Than To-Day's Express

Building Up The Navy

Thousands Of Workmen Busy In Great Britain's Shipyards

Thousands of workmen in Great Britain's shipbuilding yards are engaged in the biggest naval construction program in world history.

The Admiralty is building or has ordered 115 ships, ranging from mighty battleships to tiny torpedo boats, submarines and mine sweepers. In addition, 21 other ships are projected for this year, enough to increase the tonnage of the British Navy by one-third.

Every rivet driven into a hull, every gun mounted, represents another step forward in Britain's rearmament program designed to make the country invulnerable to attack and restore the navy to a paramount position on the seven seas.

The list of vessels already on the dockyard stocks or on order, would make a formidable fleet in themselves: six battleships, five aircraft carriers, 17 cruisers, 40 destroyers of different sizes, 15 submarines, five escort vessels, seven mine sweepers, four patrol ships, two surveying ships, two depot ships, three river gunboats and many small craft—500,000 tons of steel strength.

The 1939 program, which hasn't reached the shipbuilding yards, is as follows: Two battleships, seven cruisers, six aircraft carriers, three submarines, three minelayers, two river gunboats, two depot ships, one repair ship and many small craft such as the torpedo boats and boom defence vessels.

First Polar Air Mail

Carried From King's Bay In 1926 By Commander Byrd

Until you begin to study stamps and covers you cannot realize that there have been many Arctic mails. In 1926 Commander Byrd carried a mail of 99 letters from King's Bay to the pole and back in 14 days, and this was the first actual polar air mail.

After the flight, the Italian airship Norge crossed the pole and finally reached Alaska. Although it has been announced that air mail will not be carried on this trip, it was discovered that about 175 covers had been carried in secret by the Italian crew. To-day, of course, the covers are worth a good deal of money.

The dirigible Italia carried official mail to the pole on May 24, 1928, but was wrecked on the return trip, and the crew, explorer, Amundsen, lost his life in going to the rescue of the crew. Only 29 covers were salvaged when the dirigible was finally blown off the crew taken to home.

Sweden prepared air mail for the first trans-arctic airman over the pole in 1929, but the flight had to be abandoned when Greenland was reached, and the letters were ultimately taken by steamer to New York.

At least two German airships have flown over the North Pole. The first flight was in July 1931, and there was another survey a month later.

His Scheme Worked

Man Used New Idea To Get Roast For Nothing

A new stunt for securing a roast was discovered in Norwich, England. Recently T. Wright & Son, from near Ayrmer, opened a butcher shop in the town, and gave thousands of pounds to the parent customer walked into the shop and explained that he had just returned from a trip to California and was consequently short of cash, but that he had several five-pound pieces of money in the car which he would like to trade for equal value in meat. For the money he wanted a pound. Mr. Wright said that the trade could be made and cut off a nice piece of meat which, when weighed, came to 81.

The man found friend who took him to the car and returned immediately with two pairs of shoes. He failed to return.

His Funny Story

The elevator was not working, so the three men had to wait upstairs to the 50th floor. One of them suggested that they should tell funny stories to try to make them notice the distance.

They had reached the 50th floor when it was the third man's turn. "The story I have to tell will break your heart," he said. "I never mind about that, tell us," said the other two.

They went on arguing, until at last he told them: "I have left the key downstairs."

The nightwatchman makes the longest all-time flight of all birds. It migrates from the Yukon country to the Argentine.

It would take 40 days and nights to hatch an ostrich egg by artificial incubation.

All Have Pet Charities

Richest Women In British Spend Comparatively Little On Clothes

The question of how British millionaires spend their money arose recently following a statement that "of the fifty wealthiest citizens of Great Britain more than half are women."

It was clearly a matter for a woman to investigate and a reporter of that sex did so for the London Daily Express and made this report: "Most of Britain's wealthiest women liberate their fortunes from men who made the money, then left it to their widows and daughters to spend."

"I checked up on their money and found that they do not spend it all on clothes. They care little for fashion—they cultivate homeliness in dress as a disguise. They buy tweed jackets, woolen jumpers and use their own as horses, yachts, homes for their animals and social courtesies. They are not particularly fond of jewelry."

"Two exceptions are Lady Louis Mountbatten and Mrs. Cunningham-Bell. The former is a devotee of the left by their grandfather, Sir Ernest Cassel."

"They dress well—usually some modest little thing in black, with a diamond clip or a link of pearls, which on any other woman would be a good indication."

"They do the full social round. Lord and Lady Louis Mountbatten live in London's only penthouse—on the top of Brook House, Park Lane. It is three-storied, has seven bathrooms, and the rent is \$4,200 (\$23,000) a year."

"Some of Britain's wealthy women take passionately to some cause, spend their money crumpling for it. Nearly all of them have their pet charities, and give thousands of pounds a year to homes and hospitals they fancy."

"The women have ever made a million from their own work. Grace Fields, at \$20,000 (\$250,000) a picture, looks like doing it."

Varied Sources Of Revenue

Federal Authority In Boat Position To Collect Taxes

The Windsor Star says it does make a difference which governing body collects the taxes and pays for relief. Obviously, the Federal authority is in a better and easier position to collect than any other. Its sources of revenue are so varied. It has the power to tax a thousand and one streams. It is in a position to impose levies that are so widely spread as to be harmless for practically every one, at the same time producing in the aggregate, tremendous sums of money.

As an instance, consider the federal income tax. "No one is hurt by it, yet it raises a huge sum every year. It is a talent tax instead of a two to post a letter or to get the power on the telephone. You think of what extra cent meant to the postal department in a twelvemonth."

So it goes with the sales tax, customs duties and so on.

The municipality, on the other hand, has to tax the land and the revenue. It collects its money from real estate holdings, and when it imposes a high assessment and unemployment means high rental costs and high civic taxation again—the vicious circle.

A London, Ont. magistrate has ruled that a tomato is a vegetable. But not always. Sometimes a tomato is a missile.

It is said that sleep-walking is more common in Sydney, Australia, than in any other city of the world.

CHAPTER II.—Continued

The Gas City

Planing Mill

1st St. Medicine Hat

Attention! All you tomato

owners! Mr. A. E. Oakland

as broken the record. He

rought to this office a beautiful

woman weighing just 20 ounces

it's a doozy and will take a bit

of beating. Mr. Oakland is

herefore the Tomato King to

date. Any further contenders

for this coveted honor?

The Girls' Soft Ball games

played in Lethbridge last Sunday

resulted in a game each for the

two contestants. The

afternoon score was 17-10 in favor

of Lethbridge and the evening

score was 13-10 for Redcliff.

The Lethbridge Herald in its

report of the games said that

while the afternoon game was

full of errors, Fairhurst, Frey

and Johnson played a sterling

game.

In the evening game, Rindahl,

pitched her team to a well de-

served victory over the powerful

Lethbridge aggregation.

Fairhurst was placed on the

ground in the ninth inning

and retired the Lethbridge team

in short order. Congratulations

Girls! We knew you could do it.

Interesting**Local Items**Mr. and Mrs. Fred Bailey re-
turned on Thursday night from
a motor trip through Montana.Miss Jean Bassett, of Calgary,
visited here last week end with
her sister Mrs. J. R. W. Cann.As school opens today (Thurs-
day) the swimming pool was
closed for the season last night.Miss Gladys Johnson, who has
been spending her vacation with
her sister, Mrs. Sully, at Trail,
B. C. returned to her home here
on Monday morning.Mr. and Mrs. J. R. W. Cann
had as their guests last week
Mrs. J. Miller and Mrs. Middle-
ton of Medicine Hat and Miss
Margaret Miller, of Brantford.Mr. Chas. Blasier, who was
manager of the antelope ranch at
Lake Newell, died last weekend.
He was well known by many here
who go to the Lake to fish.Mr. and Mrs. John Mitchell
and sons Donald and David, of
the L. A. Ranch, were visitors
at the home of Mr. and Mrs.
J. R. W. Cann last week end.If you know any news that you
think would be of interest to
our readers, please phone or
bring it in to the Review Office.
We would appreciate your co-
operation in this respect. * 200
is our telephone number.Mr. and Mrs. J. W. Campeau
and daughters accompanied by
Mrs. J. R. Mackenzie and chil-
dren motored to Maple Creek on
Sunday to spend the day at the
home of Mrs. Campeau's brother
Mr. Herb Stroebel.Attention! All you tomato
owners! Mr. A. E. Oakland
as broken the record. He
rought to this office a beautiful
woman weighing just 20 ounces
it's a doozy and will take a bit
of beating. Mr. Oakland is
herefore the Tomato King to
date. Any further contenders
for this coveted honor?Miss Edith Orr, who has been
visiting at the home of Mr. and
Mrs. Ed. Tester, left Monday
morning for her home at Suffield.Mrs. G. N. Hindson was the
second guest of Mr. and Mrs.
E. L. Stone, on her return trip
from Montreal to her home in
Calgary.The Baby Clinic will be held on
September 14th, and 28th.
October 12 and 26Cut out this notice and save it
for reference.Miss Marie Fitzhugh, who has
been visiting relatives at Card-
ston for the past few weeks, re-
turned to her home here on
last Saturday.Capt. G. E. T. Eyston, the
retired British Army captain,
smashed the world's automobile
speed record last Saturday. In
Utah he made a record of 345.19
miles in one hour.Wheat cutting in this district
is almost completed and in many
districts threshing is in oper-
ation. Threshing is practically
finished on the farms in close
proximity to Redcliff.At the Horticultural Show
held in Medicine Hat last Friday
and Saturday, Mrs. A. E. Shaw
won second prize for yellow
gladioli and Mr. Shaw won sec-
ond prize for his potatoes. Con-
gratulations are due to Mr. and
Mrs. Shaw.The common interests of Can-
ada and the United States point
to the "inevitability" of a writ-
ing agreement between them for
a marketing of their big export
wheat crops. Henry Wallace
said Saturday as he reached
Canada on his first visit as U. S.
Minister of Agriculture.It has been the custom of Th-
review for many years to give
to newly wed couples a year's
subscription to the Redcliff
Review as a wedding gift. If
any of our readers should know
of any couple whom we have over-
looked and will let us know, we
shall consider it a favor. Just
